

Information for patients referred for consideration of robotic radical prostatectomy

To make a referral, complete and fax this form to 01223 281271, or complete it and send it to:
Cambridge Urology Partnership, Nuffield Health Cambridge Hospital, 4 Trumpington Rd, Cambridge, CB2 8AF

You may also fax/send an accompanying letter/ print out if you wish to do so. Any supplementary information should be included in this letter.

It is important to try and include all reports of relevant scans as requested, and we will need to see the original scans prior to consideration of any treatment. The patient may bring them with them to their appointment.

Cambridge Urology Partnership will contact the patient and make an appointment.

DATE OF REFERRAL:

<u>The Patient</u>	<u>Information about patient's prostate cancer</u>
SURNAME:	Date of diagnosis?
FIRST NAME:	Where was the cancer diagnosed?
ADDRESS:	The PSA at diagnosis?
DOB:	The most recent PSA?
TEL No:	Date:
WORK NO:	Prostate volume on transrectal ultrasound (if known)
MOBILE NO:	Gleason Grade* ¹ (if known)
E-Mail:	No of involved cores* ² (if known)
Does the pt have a previous urological history? Y N	T stage of tumour* ³ (if known)

<p>Medical History:</p> <p>Medication:</p> <p>Does the pt take aspirin / clopidogrel / warfarin</p> <p>Allergies Y N</p> <p>Body mass index (BMI)</p>	<p>Have you had any of the following investigations ^{*1}? If so, please state the date and provide the report on a separate sheet.</p> <p>MRI?</p> <p>CT?</p> <p>Bone Scan?</p> <p>Have you had any other treatment for prostate cancer including hormonal treatment ^{*5}?</p>
<p><u>Your GP:</u> NAME:</p> <p>ADDRESS:</p> <p>TEL NO:</p> <p>FAX NO:</p>	<p><u>Your Urologist</u> NAME:</p> <p>ADDRESS:</p> <p>TEL NO:</p> <p>FAX NO:</p>

^{*1}:The Gleason grade in prostate cancer gives an indication of the degree of aggressiveness of the tumour. It is denoted as two numbers which are added together to give a score (e.g. 3+3 = 6, 3+4 = 7, 5+3= 8 up to a total score of 10)

^{*2}: The number of involved cores compared to the total number of prostate cores taken at biopsy gives an indication of the volume of the disease

^{*3}: The 'T' Stage of a prostate cancer gives an indication of its extent. Initially this will be a clinical impression from the 'feel' of your prostate to your urologist. If your tumour is impalpable and was picked up only through a raised PSA and biopsies, it would be a T1c. A palpable tumour on one (T2a) or both sides (T2b) of the prostate will have a higher T-stage.

^{*4}:MRI (magnetic resonance imaging, computerised tomographic (CT) and bone scans are not indicated in all patients. You may not have had a scan if you have an early stage tumour

^{*5}:Have you been started on hormone treatment (e.g. Casodex, Prostop or Zoladex)? Have you had brachytherapy or radiotherapy which may affect our ability to offer you robotic surgery? If you have not had any treatment, what treatment has been offered or recommended for your prostate cancer?
